Joe Alt
Full Stack Web Developer

— About Me

I'm a full stack, front end oriented developer who's passionate for creating websites the client will understand and love using good knowledge about UI/UX. Currently, I'm focused on expanding my knowledge of JavaScript libraries and frameworks to enhance my skills for upcoming projects

My strengths include being dedicated, fast learning and hardworking. I'm also someone how makes 100% use of the 4 years of experience in JavaScript I own, the eager to learn and improve, and searching to get into a challenging work environment that allows me to grow as a professional.

— Professional Experience

Full Stack Developer │ Assembler Institute of Technology
October 2022 - May 2023

Intensive 7-month master in software development. More than 1200 hours of full stack real-world oriented projects with Agile methodology based on "Learn by doing" and pair programming, focusing on up to date strong fundamentals. Three of the many projects done:

Audity │ React.js, TypeScript, Node.js, Express and MongoDB — Click here ⧉
Music platform inspired by Spotify with all the key features as listening, create playlists, upload songs add to favoriets among other things. It's a PWA, mobile friendly and with admin panel to control the content.

GitHub Ultimate │ React.js, TypeScript, Node.js and GraphQL — Click here ⧉
Login though Github OAuth app to show user repos with search and sort functions called from GitHub GraphQL API with unit Jest testing.

M&G │ React.js, SASS, Node.js, RESTful API, MongoDB, Spline3D — Click here ⧉
Gifs page, where you can explore all the hottest and most popular memes from the GIPHY API. Together with the ability to upload your very own GIFs directly from your local disk or through a URL. It also has a 3D asset embedded from spline.design.

Web developer │ for 5 businesses which two of them:
2017 — 2022

Andalusia Health Retreats │ Wix — Click here ⧉
Website for an organization of vacation retreats for groups or individuals. I'm proudly the web developer and implemented payment methods and a filter/sorting system with JavaScript for the venues they offer. All with great SEO

Massages and Wellness at home │ Wix — Click here ⧉
Website about massagist portfolio, history and contact options if interested in booking a session. Seamless integration with appointments implemented through the calender and a list of all possible massages available. Adding google analytics and maps
